^aInstitutional funds and other sources include an institution's operating funds, endowments, private donations, tax-exempt bonds and other debt financing, and indirect costs recovered from federal and nonfederal sources.

^bSome institutions provided total dollars for new construction but did not provide the dollars for the specific sources of the funds. The dollars for new construction at these institutions are included in the total figures but not in the specific funding sources. Therefore, the dollars from specific funding sources will not total to the dollars from all sources.

NOTES: Details may not add to totals due to rounding. This question on construction costs was not asked for FY 2000–01; therefore, no data are reported here. Only construction projects costing over \$250,000 for a single field were reported for FY 2002–09; construction projects costing over \$100,000 were reported in previous cycles.
